### **What is Bio-Resonance?**

Bio-Resonance is a non-invasive computer-assisted system designed to detect, analyze, and balance disturbances and conditions in the body before they appear physically. An electronic filter in the device distinguishes between healthy and unhealthy vibrations. Natural and healthy vibrations are strengthened and electromagnetic fields returned to optimal levels.

### **How Does Bio-Resonance Work?**

Bio-Resonance measures harmonic oscillation patterns to help balance and regulate energies within the body. Free flow of energy to the chakras and meridian channels is restored resulting in improved mental clarity, vitality, and overall wellness. Bio-Resonance is being used in many countries throughout the world and scientific studies have provided objective proof of its effectiveness.

### **Bio-Resonance is effective in helping to:**

- decrease and relieve neck or back pain
- lower stress levels
- alleviate chronic fatigue syndrome
- reduce or eliminate allergies and food intolerances
- improve energy
- assist with detoxification
- aid post surgery/injury healing

**Profoundly accelerate your healing, awaken your energy body, and increase your awareness.**
